

HANDS FREE DOOR PRODUCTS

HELP AVOID THE SPREAD OF GERMS

Door handles are key areas touched every day carrying germs

Many people are concerned with catching a virus or being exposed to germs. Door handles are among the most germ-infested objects and research shows contamination of just a single doorknob can help spread germs throughout office building, hotels, schools and more facilities within hours. Cennox offers two products to help risk prevention by using our covered arms or feet instead of our bare hands to open and close doors.

Both the hands free door openers (arm and foot) are easily mounted to a door handle or the base of a door and come with instructions and mounting screws.

Visit shop.cennox.com to purchase or call (404) 605-0100 for more information.
