ANTI-VIRAL CLEANING & SANITIZING SERVICE

Providing a clean, safe and viral free environment for customers is what customers expect. Cennox understands the importance of cleaning and maintaining field equipment, which is used by the public daily, creating the opportunity to reduce germs and dirt, downtime due to system failures, poor image to your ATM fleet and security breaches.

Cennox can help provide your customers peace-of-mind with our Anti-Viral Cleaning and Sanitizing service. Along with our ATM cleaning service and maintenance programs you can give your customers the added protection they've come to rely on. While our skilled technicians are on site, they take the extra step to assess the area to determine your cleaning and maintenance needs.

With years of experience, Your customers expect the best. We help you deliver.

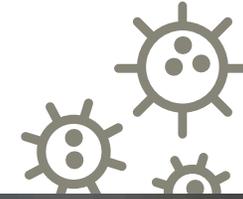

ANTI-VIRAL CLEANING & SANITIZING SERVICE

Our trained and experienced technicians apply a ready-to-use, hospital grade disinfectant cleaner on all external surfaces of the ATM and other customer facing equipment. The effective disinfection and cleaning performance acts fast, and is a simple, non-rinsing formula, lasting for 48 hours.

- > A single step product solution to killing critical viruses and bacteria
- > Effective against 27 micro-organisms including MRSA, VRE
- > Surface protection: non-corrosive, non-bleaching formula disinfects hard surfaces without creating destructive micro-cracks that harbour pathogens
- > Environmentally responsible: no VOC's or added fragrance
- > Formulated with Accelerated Hydrogen Peroxide technology to deliver fast-acting, broad spectrum disinfection with enhanced cleaning power
- > Designed for healthcare, child care centers, first responders and hospitality

With almost 10 times the amount of detergent found in a typical diluted neutral detergent mix, it also leaves minimal streaking, providing a prestige finish. Our Anti-Viral cleaning service can be scheduled as a one-time clean or on a recurring basis to ensure your equipment is always clean and safe for your customers.

“ With the global rise of virus concerns, today is more important than ever to reassure your customers that your equipment is clean and safe to use.

DEEP CLEANING SERVICE

YOU'VE ASKED, WE'VE LISTENED Cennox is Now Offering Deep Cleaning and Sanitizing Services

Cennox has been asked by many of our clients large and small to pivot our existing cleaning and maintenance services to take on a branch cleaning and sanitizing approach. Cennox has deliberately lowered our pricing by offering a wipe and walk service, to ensure that all customers have access to these vital services and keep employees and customers safe and our families employed.

PROVIDE A CLEAN & SANITIZED ENVIRONMENT

Reassure Customers Visiting Your Branch

Cennox has experienced technicians available across the United States to provide deep cleaning and sanitizing services. We efficiently and effectively clean areas inside and outside of your institution to ensure all key areas are covered.

Financial institutions large or small will benefit by utilizing our skilled service team to clean and sanitize your hard service areas. This includes but not limited to equipment and counters, which are used daily by customers and staff. With years of experience, your customers expect the best. We help you deliver.

FOGGING SERVICE

QUICK SANITIZING COVERING LARGE AREAS

Effective Fogging Solution to Eliminate Viruses

Cennox has experienced technicians available across the United States to provide deep cleaning and sanitizing services. Our mission is to keep businesses operational and viral free by providing a fogging disinfection service to help minimize germs and viruses from surviving.

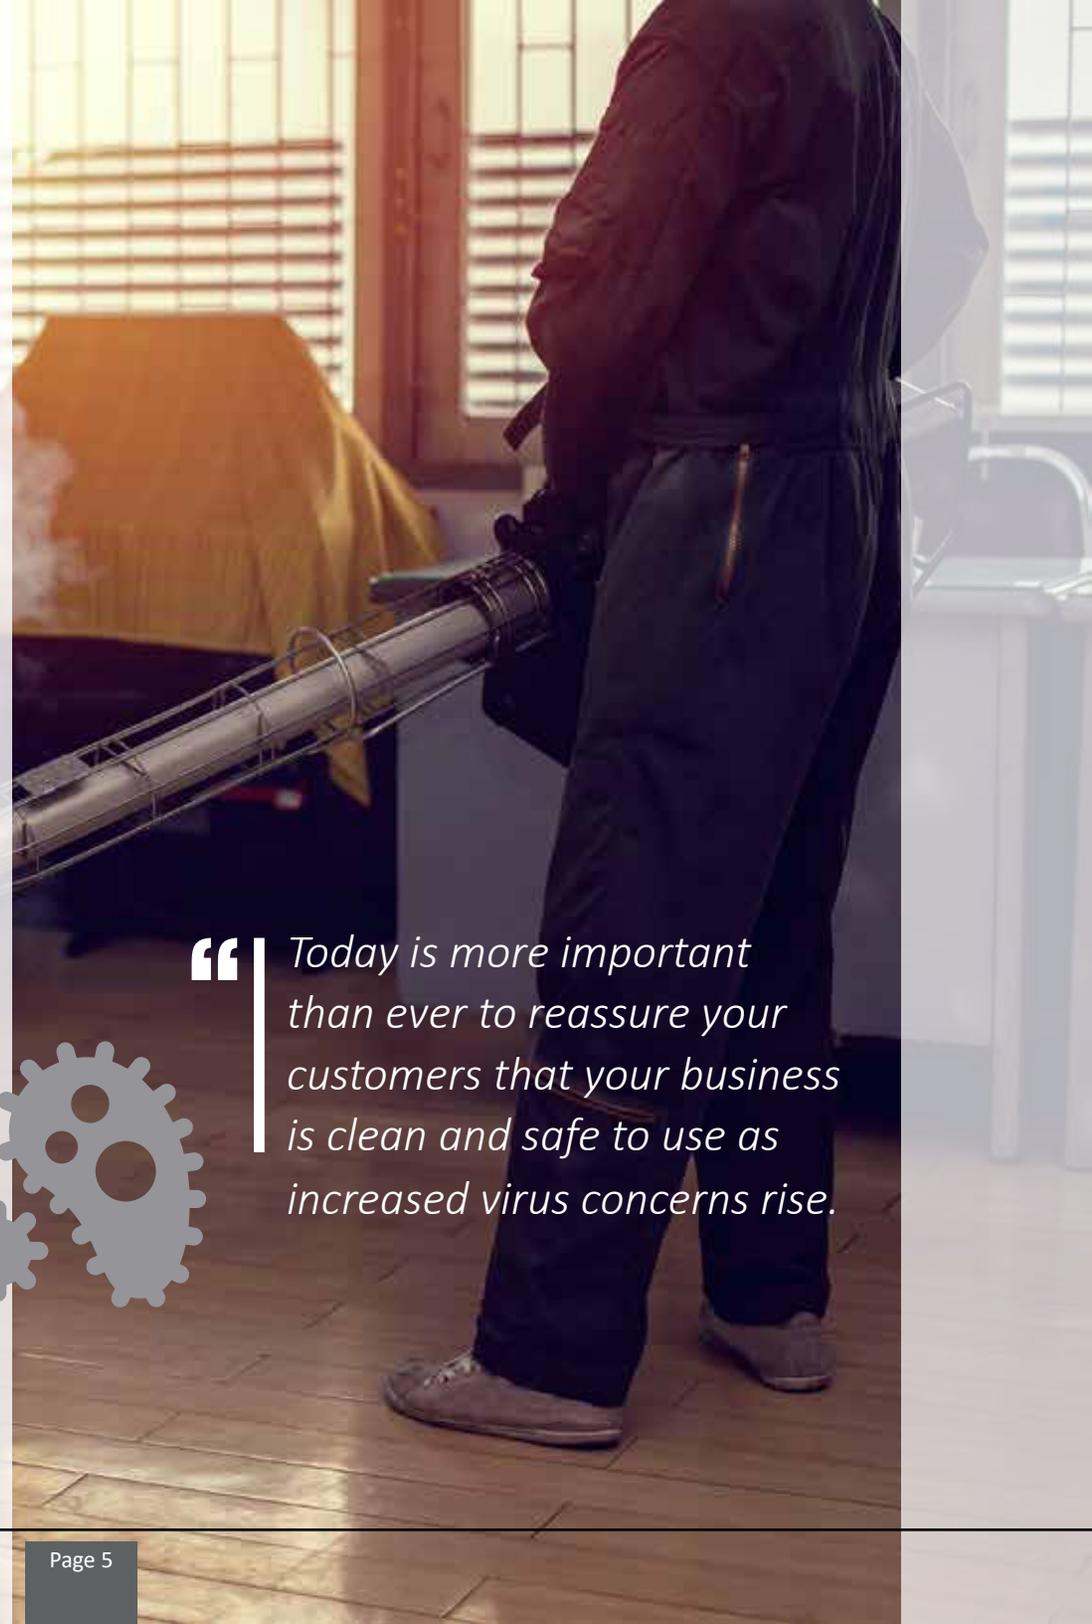

The fogger is an electric ULV cold fogger sprayer, which is small and convenient to use and maneuver around small spaces. The application process is used to treat large areas to control borne transmitting viruses.

Our teams are also available to undertake our deep clean service during business downtime and/or closures. The virus can stay active on some surfaces for 9 days - our deep cleaning and fogging service will help keep your facilities clean at the convenience of your operations.

Our service technicians, who provide national coverage in all major metropolitan areas in the 48 continental states and Alaska, can reach the sites required to provide a clean and sanitized environment for your customers.

“ *Today is more important than ever to reassure your customers that your business is clean and safe to use as increased virus concerns rise.* ”

HYGIENE SCREEN PROTECTION

PROTECTING STAFF & CUSTOMERS

During these times of uncertainty, Cennox understands that even during a pandemic such as the Coronavirus, the livelihood of people still relies on the ability of essential businesses to remain in operation, and in some cases, open to the public.

In response to the growing pandemic, Cennox has created a Hygiene Screen to minimize the contact between staff and customers which offers a temporary solution that can be installed easily, quickly and with minimal disruption.

This low-cost solution can be customized to fit anywhere people come into contact and help shield staff and customers against airborne germs from coughs and sneezes.

- > Quick and Easy Installation
- > Customizable and Innovative
- > An Affordable Solution

“Cennox can help your staff and customers stay protected while helping others during this critical time.”

HAND SANITIZER

GOOD HAND HYGIENE SOLUTION AVAILABLE

Hand sanitizer can help curb the spread of germs when water and soap are not within reach. Alcohol-based hand sanitizers can quickly reduce the number of microbes on hands in some situations.

In response to the need for hand sanitizer, primarily to provide to our staff and field technicians who are working daily to help ensure businesses are staying clean and safe, Cennox has produced hand sanitizer. The formula is made to the World Health Organization guidelines.

The WHO formulations were produced jointly by pharmacists, technicians and by other professionals. When using hand sanitizer, apply the product to the palm of one hand (read the label to learn the correct amount) and rub the product all over the surfaces of your hands until your hands are dry.
