

# THE AEGIS5

## PROTECTING YOUR PUMPS FROM CARD SKIMMERS!

As card skimming increases at the gas pump, Cennox has designed **AEGIS5**, a five point card protection solution specifically to detect and protect against card fraud at the pump.

Cennox, a leading company in the development of card security products, has launched the **AEGIS5**. A multi-layered protective solution, **AEGIS5** prevents skimmers from being installed, provides a visible deterrent to criminals and can detect when illegal activity is underway at the gas pump.

### ONE TIME INSTALLATION COST

Cennox benefits from having our own accredited nationwide field team, who are authorized to install the **AEGIS5** at gas stations. Unlike other organizations, we do not charge installations per pump, but per site visit. Our solutions are effective and our pricing attractive.

### AN INDUSTRY UNDER ATTACK

- It is estimated that 37 million Americans refuel daily.
- 29 Million pay for fuel with a credit or debit card.
- A single compromised pump can capture data from 30 to 100 cards per day

**1. NEW ADVANCED CABINET LOCK SET**

Designed to replace the freely available universal locks, a new advanced cabinet lock set provides the first line of defense to prevent illegal access to the gas pump chamber.

**2. THE 'BULLET STUD'**

The 'Bullet Stud' can be installed on-site and retro fit to the card reader. This visible deterrent prevents the criminal installing overlay skimmers on the pump.

**3. ARMOR PLATED CASING**

A unique reinforced armored casing is fitted inside the gas pump chamber. This defensive element prevents access to the card reader and supporting electronics.

**4. A 'ONE TIME CODE' LOCK**

Built into the armor plated cage is a 'one time code' lock. Designed to only give access to approved staff or engineers. With a double authentication protocol, each lock is specifically allocated to our customers account.

**5. SIGNAL JAMMING**

For total protection, the **AEGIS 5** from Cennox, can also come with our electronic signal jamming for the ultimate in pump security.

This is a well organized crime, undertaken by people with no respect for the law, the people they impact or the businesses they effect. I'm proud to be able to supply an effective solution which stops this crime, protects our clients livelihoods and rebuilds their customer's confidence that their data is safe at the pump.

**Tracy Heiner, CMO, Cennox**
