

Note Counter

BC 231SD

Count mixed notes and with SD card update!

Counting mixed Euro notes without any hassle? The BC 231SD can do so and also CHF, GBP and US Dollars can be counted too! Advanced sensors take care of a reliable counterfeit detection (successfully tested!) and after the counting you can easily get a detailed report on the bright LCD display or print it via the (optional) printer. Software updates? Get the micro SD card and you are almost done! Counting only sorted Euro notes? In that case the (cheaper) BC 131SD can be an alternative. Combine good detection with user friendliness and mixed counting: the BC 231SD takes care of that !

CASH TESTER

Key Features

- Can be used for different currencies
- Update via micro SD card
