

Passive & intelligent ATM protection

— THE CASH SHUTTER GUARD

ATM protection from a variety of shutter related fraud attacks.

—

The Cennox Cash Shutter Guard is designed to protect against a variety of shutter related fraud. The restricted aperture denies vandals easy access to the cash shutter and makes it more difficult to fit cash traps.

Cennox ATM protection

Cennox specialise in providing a portfolio of security products, designed and built by our research and development team in the United Kingdom, Europe, and the United States and have succeeded in delivering huge blows to the criminal community.

With many of our products actively developed in partnership with banks to address their specific requirements, Cennox continues to lead the way with innovative security products and their implementation, protecting the financial community and their customers.

The Cash Shutter Guard

SUPPORTS PROTECTION AGAINST:

- + Solid explosives
- + Cash traps
- + TRF fraud
- + Vandalism

KEY FEATURES

- + Restricted aperture - denies vandals easy access to the cash shutter.
- + Angled cash present - makes it more difficult to fit cash traps.
- + Stops reverse transactions - stops duping the ATM into thinking that the transaction has been cancelled, but still releasing the money.
