

Turnkey Facility Transformation Solutions

RE-IMAGINING THE SPACES IN WHICH WE THRIVE

We provide a **different approach** to service planning, design, execution, and ongoing support.

What makes a transformed space a success?

Designing a demographically relevant environment

We explore how we can deliver an environment that connects with each of your important demographics of customers.

Self-service devices driving customer satisfaction

We transform traditional ways of retail by giving your customers access to a wider array of service and devices which optimizes your staff to engage with customers.

Operational efficiencies to drive down costs

Cennox is saving our customers time and costs while delivering tangible improvements to how they process the services they provide.

Our Approach

From day one, although managed by a single point contact, Cennox is able to bring multiple in-house transformation specialists to all key briefings. Our approach to first contact with any client's project is simple - understand why this project is important to them. What do they want to achieve? Who are they designing it for? What do they want the end environment to say about them?

... only then can the journey really start.

Our Solutions

- + Technology Planning & Integration
- + Construction & Fit-Out
- + Signage Manufacturing & Installation
- + Security Planning & Integration
- + In-House Partner Management

Benefits from day one

The quintessential benefits of facility transformation is the opportunity to improve the use of in-location resource, the positive impact on customer experience, and the enhanced changes to internal processes through the deployment of new technology.

Why choose Cennox?

Cennox provide the widest portfolio of solutions aimed at delivering facility, security, and technology innovations. Our Projects Division excel in providing the full-wraparound service for our customers. They are responsible for delivering numerous construction and roll-out projects for our clients.

This 'one supplier approach' has streamlined the relationships and operational delivery for our customers that are embarking on either one-off or multi-site development projects.
