

Deny the prize of the crime

— THE INK STAINING SOLUTION

Immediate protection and
future crime deterrent

Cash stored in cash cassettes has become a target for criminals globally. Our ink staining solutions help customers to significantly reduce that risk by protecting the cash inside the most common cash cassette types during attacks as well as during pavement risk.

Benefits of the Ink Staining device

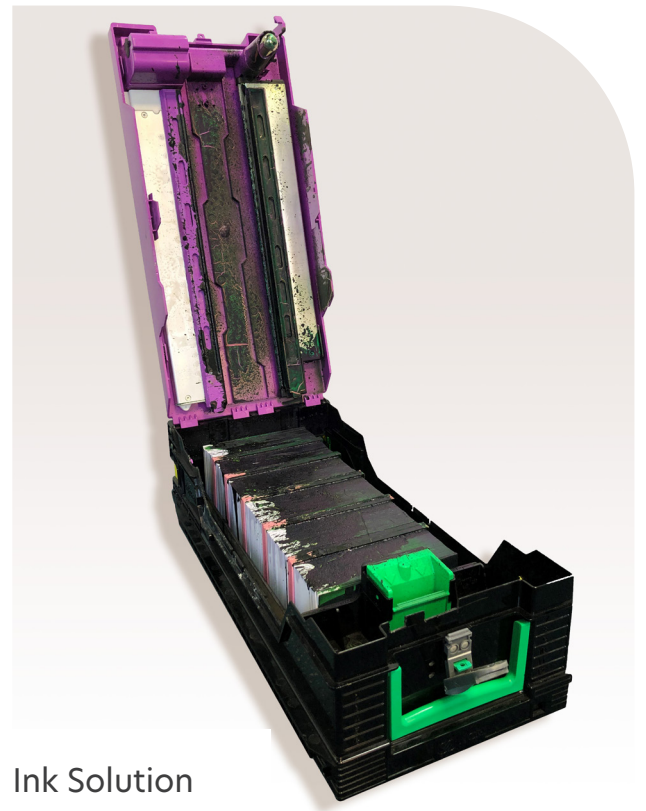

With the added benefit of consumer knowledge and their understanding of what ink dye is and that it's purpose is used for staining stolen currency, the financial industry has the lead on detecting and removing spoiled bank notes from circulation.

SECURITY ADVANTAGES

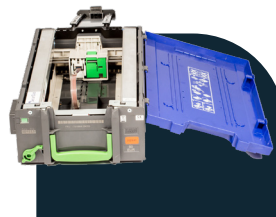

- + Automatically stains the cash when the machine is attacked
- + Technology is integrated into the lid or body of the cassette and is invisible to both customers and criminals
- + Cassettes are easily identified by industry acknowledged labelling
- + State-of-the-art inks with markers guarantee optimal staining performance and traceability

CUSTOMER ADVANTAGES

- + Compatible with popular electronic locks and automatically arms and disarms the cash cassettes, removing the need to manage physical keys or remote controls
- + Clear visual and audible signals are easy for staff to operate during normal daily use
- + Lowered skill required to maintain units reduces maintenance cost significantly.
