

Engagement Activities in Alignment with the Goals of the Paris Agreement

CENNOX GROUP LIMITED STATEMENT

At Cennox Group Limited, we recognise the urgent need for collective action to address the global challenge of climate change. As a responsible corporate company, we are committed to aligning our engagement activities with the goals of the Paris Agreement to limit global warming to well below 2 degrees Celsius and pursue efforts to limit it to 1.5 degrees Celsius above pre-industrial levels.

Our engagement activities will focus on the following key principles to support the objectives of the Paris Agreement:

Mitigation

- + We will prioritise efforts to reduce greenhouse gas emissions across our operations, supply chain, and product lifecycle. This includes investing in energy efficiency measures, transitioning to renewable energy sources, and adopting low-carbon technologies to minimise our carbon footprint.

Adaptation

- + We will assess and address the physical risks posed by climate change to our business operations and infrastructure. This includes implementing resilience measures to mitigate the impacts of extreme weather events, changing weather patterns, and other climate-related hazards.

Transparency

- + We are committed to transparently disclosing our climate-related risks, opportunities, and performance metrics in line with industry standards and best practices. This includes reporting on our progress towards achieving our emission reduction targets and adapting to the impacts of climate change.

Collaboration

- + We recognise that addressing climate change requires collaboration and partnership across sectors and stakeholders. We will actively engage with industry peers, government agencies, investors, and communities to leverage collective expertise and resources in advancing climate action initiatives.

Innovation

- + We will promote innovation and research to develop and deploy climate-resilient technologies, products, and solutions. This includes investing in research and development to enhance the efficiency, sustainability, and resilience of our business operations and offerings.

Advocacy

- + We will advocate for supportive policies, regulations, and market mechanisms that facilitate the transition to a low-carbon economy and accelerate the implementation of climate mitigation and adaptation measures. This includes engaging with policymakers and industry associations to shape and influence climate-related policies and initiatives.

By integrating these principles into our engagement activities, Cennox Group Limited is committed to playing its part in achieving the objectives of the Paris Agreement and contributing to the global effort to address climate change. We recognise that our actions today will shape the future for generations to come, and we are committed to driving positive change towards a more sustainable and resilient world.
