

# The RecyclerMax

THE LINCSAFE PORTFOLIO | US MODEL / LR410

The **RecyclerMax** is a high capacity **banknote and coin** back-office cash recycler. This device is designed to support retail stores to automate their cash management process through key touchpoints in the day. The **RecyclerMax** prepares the tills at the start of each shift, provides top-ups during the day, and enables the entire contents of the tills to be deposited at the end of each working day. The solution counts, sorts, and stores the notes and coins, making the whole cash management process quick, efficient and secure.
