- Locks options available on request
- 24/7/365 live technical support when needed
- SR2 electronic control lock standard

## Make quick, secure cash drops with ease.

The mail box drop enables you to easily make bank bag type drops. The mailbox is designed to accept bulky drops and deposit them into the safe. This allows you to make those types of drops without opening the main door to the safe. The safe is fit with either one or two electronic locks, one for each compartment. Each electronic lock is programmable with unique user codes, limiting access to only those who are authorized. Some models have locks that will also allow you the capability to set a time delay, further deterring theft and armed robbery.
