

## Illuminated fabric panels

# Make your message impossible to miss

Cennox illuminated fabric lightbox panels deliver instant, high-impact brand messaging that stops people in their tracks – without the cost, complexity or maintenance of digital screens.

Bright, evenly lit, designed to fit and beautifully finished, these panels transform walls, counters and feature areas into powerful communication spaces.

Change designs and swap out the graphic panels for seasonal or product specific promotions.

Contact us for details on our **design** and **installation** service

## End-to-End Service

Cennox manages the full lifecycle of your illuminated fabric panels, including:

- Procurement of custom size light box systems
- Pre-installation site surveys
- Professional installation and electrical connection services
- Design, artwork and fabric print production
- Planned site visits to swap seasonal or campaign panels
- Ad-hoc replacement of damaged or updated graphics
- Nationwide coverage

One supplier. One process. One accountable partner.

## Illuminate your brand with confidence

Whether you're refreshing a retail space, launching a new campaign or creating standout brand moments, Cennox illuminated fabric light box panels deliver impact, flexibility and value – backed by a trusted national service provider.

### Big impact. Total flexibility.

Illuminated fabric light boxes create a bold visual presence that elevates brand perception and draws attention to key messages, promotions or wayfinding.

- Striking illumination for maximum visibility
- Premium finish that enhances the customer environment
- Ideal for permanent branding or campaign-led messaging

And when your message needs to change, so can the panel.

### Swap Messaging. Not Hardware.

Fabric graphics can be quickly and easily swapped, making light box panels perfect for:

- Seasonal campaigns
- Promotional activity
- Product launches
- Rebranding or refurbishments

No specialist equipment. No downtime. Just a fresh, high-impact message when you need it.

### Cost-effective alternative to digital displays

Unlike digital screens, illuminated fabric panels:

- Use significantly less power
- Have lower installation and maintenance costs
- Require no software, updates or ongoing technical support

That means eye-catching impact without ongoing expense.
